

Technical details

Connection	G1/8
Nominal Size	1,4 mm
Temperature range	-10°C ... +70°C
Medium	Filtered, oil-free and dried compressed air according to ISO 8573-1:2010, Class 7:2:4, instrument air, free of aggressive additives. Differing the pressure dew point must be at least 10°C below lowest occurring ambient temperature.
Materials	Body: Al (anodized), seals: NBR and POM, inner parts: Al, brass, stainless steel
Protection	IP 65 according to EN 60529
	Valves in accordance with 2014/34/EU (ATEX) available (see page 10)

Electrically operated poppet valve. The manual override is detent and is operated by screwdriver.

2/2-way-valves

MS-18-210-HN-xxx
3/2-way, single solenoid, mechanical spring return, NC

Device marking

Electrically operated valves are marked as follows:

Marking according to DIN EN ISO 80079-36/ -37.

II 2G Ex h IIC T5 Gb
II 2D Ex h IIIC T100°C Db
-10°C T_{amb} +50°C

Electrically operated valves conform to equipment category 2 can be used in Zone 1 respectively in Zone 21. For the use in hazardous areas the category group of the used coil has to be taken into account. The specification of the whole equipment corresponds always to the lowest category of the single components.

Divergent dimensions

The valves are equipped with special electrical equipment. As a result, the dimensions of these components may change. In addition to the valve dimensions, please note the dimensions of the solenoid coils on the following pages.

Please observe the respective operating instructions and declarations of conformity. These are enclosed with the products and are available at www.airtec.de.

Electrical options

ATEX-category	Voltage	Power consumption	Ignition protection	Solenoid coil #	-xxx
3GD	24 V DC	2.7 W	Non-sparking device	23-SP-043-A12	-B12

Delivery is only made in a fully assembled state with valve, as the approval relates to both the electrical and mechanical components. The delivery of individual parts is only permitted for replacement purposes.

The operating instructions for the valve and the electrical equipment must be taken into account before putting into operation. These are included with each valve and are available at www.airtec.de.
